Hello there, my name is Raheem Kirlew. I'm currently a 2<sup>nd</sup> year student at University of Winnipeg enrolled in an Applied Computer Science degree program. At age 14, I was told to make a website for a class and since then I have been addicted, not only to making websites but also developing software that not only provides me with entertainment but also assist me in day-to-day life. Calling myself passionate about programming would be an understatement, since I live and breathe computer science. I aspire to be the best software engineer I can be and in doing so, make the lives of others easier.

---

## Interests

Apart from programming, I also enjoy playing video games occasionally, sometimes I make my own games using Unity and C#. I am also an avid Youtube viewer and use it as a learning platform and for studying foreign languages.
